# Swiss Multidisciplinary Syncope Meeting

September 20, 2019  
Kursaal, Bern, Switzerland

Medtronic Patient Monitoring & Diagnostics

## Meeting Agenda

*Putting ESC Guidelines Into Practice:* The focus of the program is to educate a multidisciplinary group of clinicians on **practical strategies to simplify & improve syncope diagnosis.**

**Objectives:** Through a combination of presentations and interactive workshops with **Task Force Members of the 2018 ESC Syncope Guidelines**, we will cover how to:

- Develop an effective syncope diagnosis care pathway
- Form a syncope multidisciplinary team
- Obtain buy-in and support to increase access to syncope diagnostic resources in the hospital
- Implement effective Reveal LINQ protocols (implant through to follow-up)
