Frontiers in Lipid Management: Nucleotide Acid-based Cholesterol-lowering

17th November 2021, 17:00 – 18:45

Organized by
Zurich Heart House
Foundation for Cardiovascular Research

Chair: Thomas F. Lüscher, Zürich und London and Christian Müller, Basel

17:00 Introduction: Do we really need cholesterol?	Thomas F. Lüscher, London/Zurich
17:15 Lifetime risk: Lessons from Mendelian Randomization Studies	Georg Ehret, Geneva
17:30 Familial hypercholesterolemia: Detection and Management	David Nanchen, Lausanne
17:45 Genetic risk scores: Ready for prime time?	Alberico Catapano, Milan
18:00 Lipid management in Switzerland: Is there a treatment gap?	Konstantinos Koskinas, Berne
18:15 RNA Interference to treat hyperlipidemia: The Inclisiran programme	John J. Kastelein, Amsterdam
Panel discussion	Faculty
